Subject: Lemon Creek

Barbara,

Per our conversation earlier today, I received a phone call on Tuesday about 4:30 PM from Chris Vermeer at the City of Walnut asking for information on the storm drains that feed Lemon Creek. Apparently there was some sort of a milky-white pollutant in Lemon Creek and the Department of Fish and Game was responding and investigating. I supplied Dave McNair (Department of Fish and Game) with copies of the aerial photographs from 1999 for the area and am providing him with storm drain plans as well. If you need to contact him, his number is (714) 231-6763.

Thanks,

Jason Welday
